

Thermobox

Versatility

- Light and hygienic
- Functional
and ergonomic
- High structural strength
- Excellent insulation properties

ARPACK®

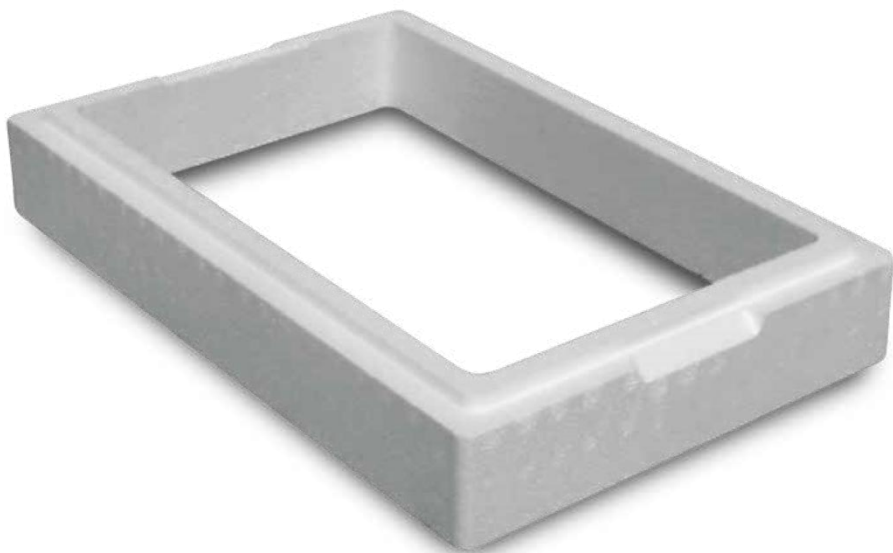

The ARPACK Thermoboxes are an ideal solution for securing all kinds of products during storage and transport.

Due to the insulation properties they protect the goods against differences in temperature, light, moisture and mechanical damage.

The Thermoboxes are made of high quality white expandable polystyrene.

It is possible to place the customer's logo on the side. Our Thermoboxes are certified by the Polish Institute of Hygiene for use during transport and food storage.

Termobox ArPACK®			
Model	External dimensions with cover	Internal dimensions without cover	Volume
